SUMMARY

Construction professional with 3 years of industry experience spanning project controls, cash flow forecasting, and contract dispute resolution on commercial construction projects. Mechanical engineering background supports strong technical fluency in reading plans and specifications, with hands-on Procore experience.

WORK EXPERIENCE

Project Engineer - Project Controls | New Line Structures | New York, NY | Feb 2022 – Sep 2024

- Delivered accurate schedules for 4 concurrent construction projects with a combined budget of \$330 million, by building detailed timelines and cross-referencing scope against contract documents at each design stage.
- Built project schedules supporting 5 proposal bids, translating design and scope requirements into realistic timelines for submission.
- Analyzed and forecasted cash flow trends to support financial planning and ensure alignment with the schedule, identifying delays and justifying unexpected invoice variances.
- Maintained accurate, on-time monthly invoicing across all active projects by cross-checking billed amounts against contract terms and resolving discrepancies before submission.

Engineering Fellow | NYC Office of the Comptroller | New York, NY | Jun 2021 – Dec 2021

- Investigated disputed construction claims by calculating independent cost estimates, reviewing contracts, and interviewing involved parties to determine the validity of each case.
- Authored findings reports and delivered a case presentation on disputes involving contested workmanship and contract-based billing disagreements, with conclusions directly informing the Bureau's final resolutions.

VOLUNTEER WORK

Mechanical Engineer | Level The Curve | New York, NY | May 2024 – Present

- Lowered production costs on assistive device designs by simplifying manufacturing processes without compromising function.
- Delivered custom devices from concept to production, by managing the full design cycle in direct collaboration with end users with disabilities.

SKILLS

- **Software:** Procore, P6, SolidWorks, Fusion 360, ANSYS Fluent, Microsoft Excel, Microsoft Office Suite
- **Certifications:** 40-Hour Construction Site Safety Training
- **Languages:** Japanese (Native)

EDUCATION

Bachelor of Engineering, Mechanical Engineering
Macaulay Honors College at The City College of New York

Dec 2020
Full Merit Scholarship – GPA: 3.71
